

PRODUCT TRAINING

COURSE: NETMRI CONFIGURATION & ADMINISTRATION

Course Description

Develop a working knowledge of configuring and managing Infoblox NetMRI appliances. Understand automated collection of network device configuration information over SNMP and SSH. Learn how to use the collected information for configuration and change management, network policy management (building from an extensive built-in list of established rules and policies) and automated compliance checks and reports, as well as the general configuration and reporting features available in the NetMRI product.

Target Audience	This is a basic-level course for team members who implement, administrate, or operate the NetMRI solution.
Products Covered	NetMRI
Duration	2 days
Learning Style	Lecture, demo, and hands-on labs
Available Modalities	Instructor-led, virtual instructor-led, on-demand
Certification Exam	NetMRI Configuration & Administration
Prerequisites	Attendees should have a working knowledge of TCP/IP protocols, SNMP and IP networking and a conceptual understanding of fault, configuration change, and performance management.
Included in Learning Sub	Yes
