

PRODUCT TRAINING

COURSE: NIOS DDI OPERATIONS

Course Description Learn the fundamentals of the NIOS Grid and how to navigate the Grid Manager UI. Build a working knowledge of operator-level responsibilities in the NIOS Grid including the operation of DHCP services, DNS services and IPAM. Get hands-on experience with managing DHCP Objects and DNS Resource Records and using Extensible Attributes, Smart Folders, Global Search, DNS Views, and CSV Export functionality. Understand how DHCP Failover works.

Target Audience This introductory course is for team members who will be conducting operator-level tasks in NIOS. It also provides the prerequisite learning to prepare team members for the NIOS DDI Administration course.

Products Covered NIOS DDI

Duration 2 days

Learning Style Lecture, demo, and hands-on labs

Available Modalities Instructor-led, virtual instructor-led, on-demand

Certification Exam NIOS DDI Operator

Prerequisites Attendees should have a fundamental understanding of networking. If you are new to networking, consider the DDI Associate course for an introduction to DDI and related networking topics.

Included in Learning Sub Yes
